

Scheduling Exports (System Admin only).

Exports can also be scheduled to run on a periodic basis to extract the report to a downloadable file for both data and files from the onboarder record. To run an Export via a schedule select the Automatic Schedule option in the Filters section of Export when creating or editing the Export.

Heading	Description
Schedule Owner	This is the assigned owner of the Export who will receive the email notification when a schedule has run and a link to access the file. Please note that Schedule Owners will only see data that they have permission to see.
Frequency	Schedules can be set to run Weekly, Monthly, or on a Custom schedule from the First Run Date
Cycle Range (Custom only)	This sets the number of days between Exports for Custom Frequency schedules. E.g 14 days for a fortnightly report
First Run Date	The date that you want the first scheduled export to run on, all subsequent reports will run as per the schedule from this date. The first Export will include data for the selected frequency prior to this date
All Companies	Account Level Exports only – selected by default, deselecting allows the user to select which company(ies) to run the Export for

Click “Save” to save all of the Export Schedule settings.

Previewing Scheduled Exports.

Select the export you wish to preview from the list in the main Export screen.

The screenshot shows a configuration page for a scheduled export. The breadcrumb trail is: Bulk operations > Exports > Test Schedule Export Ac30days Docs - [Account Level]. The page has a 'Back' button and a 'Details' button. The settings are as follows:

- Onboardee: Search for an onboardee (dropdown)
- Status: Offer completed by HR (dropdown)
- Include Documents:
- Automatic Schedule:
- Schedule Owner: Simon Connell - Admin Demo
- Schedule Frequency: Custom (dropdown)
- Cycle Range: 30 days
- First Run Date: 28/06/2021
- Last Run Date: (empty)
- Next Run Date: 28/07/2021

At the bottom, there are two buttons: 'Preview Report' (with a refresh icon) and 'Export' (with a download icon).

Note: Using the Preview or Export buttons from this screen will run the Export for data from the last scheduled date to the current point in time but not change the schedule itself.

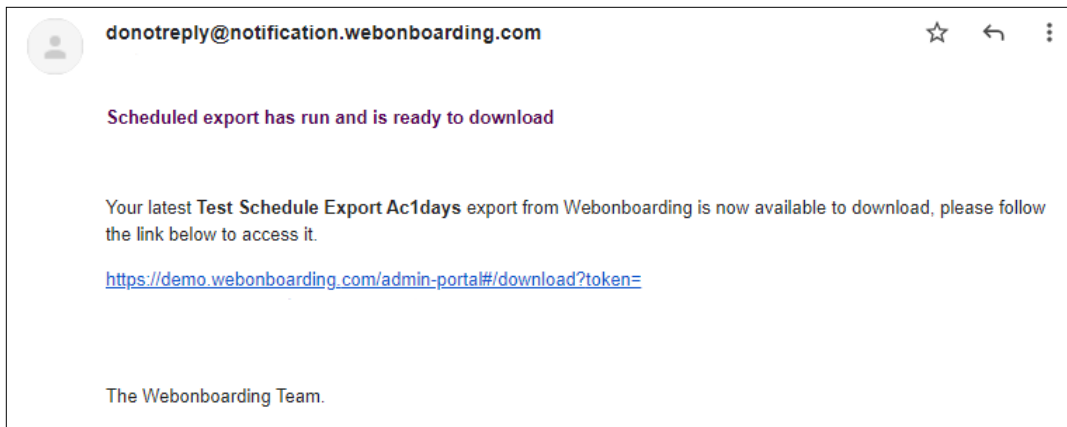

The Preview button will run the Export and display the results in the window below the settings.

The Export button will run the Export and download the results to a .CSV file.

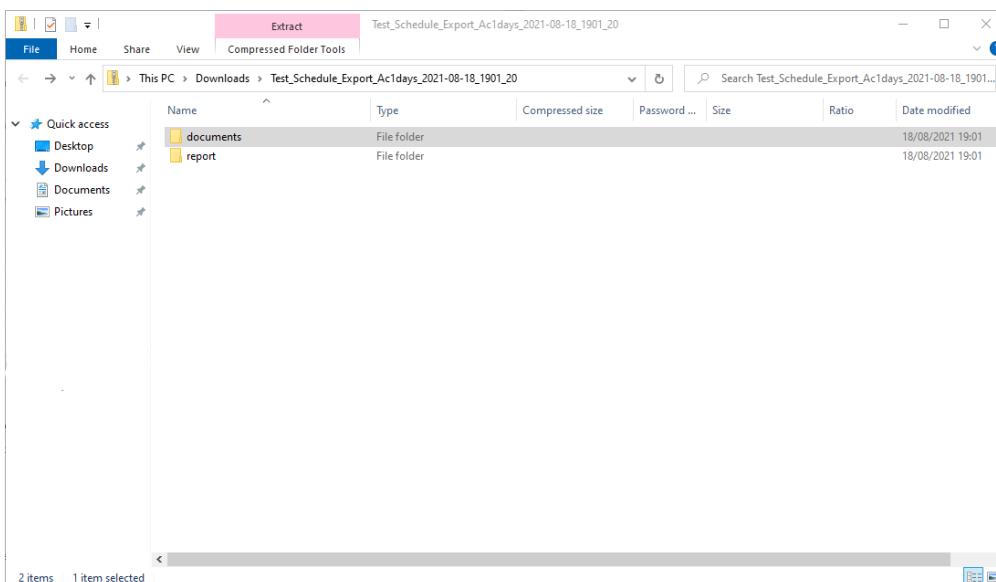

Retrieving Scheduled Exports.

The Schedule Owner will receive an automatic email from the system when the Schedule has run. This will include a limited time access link to retrieve the file.

The user will need to log in to Webonboarding in order to access the file. Once this has been done the system will automatically begin downloading the folder with the information.

The file will include a folder called 'report' containing a .CSV file with the Export information and, if documents were included, a folder called 'documents'.

In the ZIP file each onboarder will have their own folder with their documents included within it.
